Contents

1 Getting Started **3**
1.1 Introduction . . . 3
1.2 Existence, Uniqueness, and Well–Posedness . . . 6
1.3 Standard Form . . . 15
1.4 Control of the Error . . . 20
1.5 Qualitative Properties . . . 26

2 Initial Value Problems **29**
2.1 Introduction . . . 29
2.2 Numerical Methods for IVPs . . . 29
2.2.1 One–Step Methods . . . 30
Local Error Estimation . . . 34
Runge–Kutta Methods . . . 35
Explicit Runge–Kutta Formulas . . . 37
Continuous Extensions . . . 39
2.2.2 Methods with Memory . . . 41
Adams Methods . . . 41
BDF methods . . . 43
Error Estimation and Change of Order . . . 51
Continuous Extensions . . . 53
2.3 Solving IVPs in MATLAB . . . 57
2.3.1 Event Location . . . 65
2.3.2 ODEs Involving a Mass Matrix . . . 74
2.3.3 Large Systems and the Method of Lines . . . 80
2.3.4 Singularities . . . 89

3 Boundary Value Problems **93**
3.1 Introduction . . . 93
3.2 Boundary Value Problems . . . 94
3.3 Boundary Conditions . . . 96
3.3.1 Boundary Conditions at Singular Points . . . 97
3.3.2 Boundary Conditions at Infinity . . . 101
3.4 Numerical Methods for BVPs . . . 109
3.5 Solving BVPs in MATLAB . . . 116

4 Delay Differential Equations **147**
4.1 Introduction . . . 147
4.2 Delay Differential Equations . . . 147
4.3 Numerical Methods for DDEs . . . 150
4.4 Solving DDEs in MATLAB . . . 152
4.5 Other Kinds of DDEs and Software . . . 170
